## **Unbelievable!® Juice Out!™**

An industrial strength food, drink & cosmetic dye remover for carpet and upholstery. Low heat activation with an alkaline wet spotter are the keys to great results for tough stains.

Food and fabric coloring is separated from the stained fiber through a chemical reaction in the heat transfer process.

### **Removes**

Lipstick

# Unbelievable!® Juice Out!

## Directions

1. Generously drip **Juice Out™** to the stained area.
2. Gently agitate the stain with the rounded edge of either Core's T-bone spatula or tamp repeatedly with a spotting brush.
3. Wait 1 minute.
4. Submerge white terry towel in warm water. Ring out excess water and fold once.
5. With a steam iron, using the lowest temperature setting (for silk, polyester), place hot iron on top of folded moist, towel and place over the stain. A thick towel will not require the fold. Allow the iron to remain over the towel and stain for 2 to 5 minutes. Monitor the progress of the heat transfer procedure.
6. Sponge, rinse or water extract the area.
7. Repeat Steps 1—6 if color still remains (normally, 2 applications are required).
8. Any remaining dye shadows may disappear as **Juice Out™** continues to work overnight or until dry.

If applying a second time, be sure to reapply **Juice Out™** to the stain, remoisten the towel and refill the iron with water.

## For Best Results:

Incomplete stain removal (after a 2nd application) is the result of insufficient heating time at a low heat setting. A high heat setting is not necessary. The type of iron used should have steam vents covering the entire surface rather than a single row of vents around the perimeter.

The time the iron should be allowed to remain on the damp towel will vary due to the severity of the stain, the thickness and moisture content of the towel and temperature setting of the iron.

**NOTE:** In some causes, the heat transfer method may lighten or remove weaker carpet dyes (such as light blue, off white, white), so carefully examine the stained area after completion of each ap-

plication before continuing. **Core will not assume any liability for damage to fiber colors.**

**Do Not Mix with Bleach or use in conjunction with any household products.**

**Ingredients:** Water (CAS# 7732-18-5), Sodium Sulfate (CAS#7757-82-6), Surfactant Mixture (CAS# 065143-89-7), CAS# 070191-76-3), EDTA (CAS# 64-02-8), Alkanolamines (CAS# 102-71-6, CAS# 111-42-2).
